

Overview: You will create and design web pages with text, graphics, and data tables. You will then link these web pages to enable navigation between these web pages.

Prerequisites: You should be familiar with using personal computers with a mouse and keyboard and possess basic typing skills. You should be comfortable in the Windows environment and be able to use Windows to manage information on your computer. Specifically, you should be able to launch and close programs; navigate to information stored on the computer; and manage files and folders. Familiarity with Internet Explorer 7 and Firefox would be an advantage.

Course length: 1 day

- **Performance-based objectives:**
 - create a basic web page.
 - structure the content on your web page.
 - apply styles to the page elements.
 - create, modify, and format a table.
 - link web pages.
-
